SUMMARY

Full-stack developer with **3.5 years of experience**, building **web and mobile apps** with React, Angular, Node.js, Django, PostgreSQL, and Azure. Built the front end of an AI platform used by **3,000+ teachers across 600+ schools,** built 10+ enterprise APIs, and released apps on Google Play and the App Store. Now building across the React and Django stack of an HR platform **used by 1,200+ employees.**

TECHNICAL SKILLS

- **Languages:** TypeScript, JavaScript, Python, SQL
- **Backend & APIs:** Django, Node.js, Express.js, REST APIs, Azure API Management, Session-Based Authentication
- **Frontend & Mobile:** React, Angular 17+, Ionic 8, Capacitor, React Native (Expo), HTML5, CSS3, SASS/SCSS, Tailwind CSS
- **Databases & Cloud:** PostgreSQL, Firebase/Firestore, AWS Cognito
- **Tools & DevOps:** Git, GitHub, Bitbucket, Docker, Linux, Nx, Vite, Jekyll, CI/CD (Bitbucket Pipelines, Azure DevOps)
- **Testing & Quality:** Vitest, SonarQube, ESLint, Unit Testing, Chrome DevTools, Debugging, Code Reviews
- **Practices:** Agile Scrum, Google Play & App Store Publishing

PROFESSIONAL EXPERIENCE

Full Stack Engineer (Product Development Engineer I) | Phenom, Hyderabad, India | Aug 2026 - Present

Tech Stack: *React, Vite, Django, PostgreSQL, Docker, Vitest, SonarQube*

- Built features across the React frontend and Django backend, including the API that summarizes worked hours, expected hours, and overtime for all **1,200+** employees.
- Raised code quality with automated test-coverage and code-smell checks, taking the work-records module to **80%+** coverage.
- Resolved **220+ security vulnerabilities** in frontend dependencies without disrupting the existing setup.
- Optimized code by removing redundant logic and unnecessary API calls.

Frontend Engineer | OAKS Solutions, Hyderabad, India | Dec 2024 - Jul 2026

Tech Stack: *Angular, Ionic, Nx, AWS Cognito, Bitbucket Pipelines*

- Built the front end of an AI platform used by **3,000+ teachers across 600+ schools**, owning **7+ modules** and integrating AI-generated question papers and lesson plans, produced in **1-3 minutes**, into the screens.
- Built a school management app with dashboards for four user roles, and **improved load** time by roughly **10-25%** across both apps, including by lazy-loading the authentication SDK.
- Released **2 apps on Google Play and the App Store**, including the **company's first iOS app** (1,000+ downloads on Google Play), and moved mobile builds from manual to automated pipelines.
- Also delivered a mining trip-time analysis tool (50-500 vehicles), a 30+ level puzzle game, and an internal analytics app for a client.

Frontend Engineer (joined as Frontend Developer Intern) | Yarasi Enterprises, Remote, India | May 2024 - Dec 2024

Tech Stack: *Angular, React Native (Expo), Jekyll*

- Built the front end of a pre-launch social media platform designed to reduce fake content, and the mobile app for a startup-networking product that later launched on Google Play.
- Built the company's documentation site using Jekyll.

Angular Developer Intern | ToT Master (iWish Labs), Remote, India | Apr 2023 - May 2024

Tech Stack: *Angular, Firebase*

- Built the front end of an internal CRM dashboard that combines data from the company's driver, teacher, and parent apps, with TypeScript logic that shapes Firebase data for the screens.
- Built a school-bus attendance app that lets drivers record each student's pick-up and drop-off.

PROJECTS

Enterprise API Integration | Azure API Management, Azure DevOps

- Worked alongside an experienced Azure integration engineer on a client engagement, building 10+ of the 60+ APIs that connect SAP, Salesforce, Coupa, ServiceNow, and other business systems.
- Wrote policies for authentication, transformation, caching, and logging, and worked on Dev-to-Prod deployment pipelines.

Worklog: Daily Work Journal Web App | Node.js, Express, PostgreSQL | worklog.tunitive.com | github.com/Av1nag/worklog-app

- Built a multi-user app with Argon2 password hashing, database-backed sessions, email verification and password reset, and a REST API that limits every query to the signed-in user.
- Deployed it on a Linux server with systemd, Caddy (automatic HTTPS), and daily database backups.

EDUCATION

B.Tech in Electronics and Communication Engineering (ECE)

Usha Rama College of Engineering and Technology, Vijayawada, Andhra Pradesh | 2019 - 2023

ACHIEVEMENTS

Employee of the Month - OAKS Solutions, July 2025
